Summary

Final year CSE student with hands-on experience in Front end development and Strong in DSA, full stack projects, deployment, and performance optimization through debugging.

Projects

Disaster Management System Jun–Aug (2025)

- Built a disaster alert system for real-time incident reporting and emergency coordination.
- Implemented location-based services to display nearby shelters and critical resources.
- Developed using MERN stack (MongoDB, Express.js, React.js, Node.js) with REST APIs.
- Optimized performance for handling high user traffic during emergency situations.

DSA Visualizer Sep–Dec (2025)

- Built an interactive DSA Visualizer to demonstrate sorting and searching algorithms with real-time controls and step-by-step execution.
- Implemented dynamic animations using JavaScript to improve conceptual understanding of algorithm flow and complexity.
- Integrated features like speed control, input customization, and complexity display for enhanced user interaction.
- Designed a responsive and intuitive UI to provide a seamless learning experience across devices.
